

## “With CashflowByWeb your invoices are automatically followed up”

Rudy Van Avermaet

Trias BSS specializes in supplying financially related administrative software applications. The company is the largest distributor in Flanders of Systemats Popsy products, whether or not in conjunction with development work. In 2009, Trias will have existed for 25 years, with over 1.000 active clients, including among others the recycling sector and bicycle rental businesses in Antwerp, Ghent and Leuven. The company has an annual turnover of 735,000 euro, with 6 staff members. Manager Rudy Van Avermaet contributes to the success of CashflowByWeb.

**Rudy Van Avermaet:** “We were looking for new products when we became acquainted with CashflowByWeb at the 2006 B2B-Days. We were immediately won over by the idea, but wanted to check out everything thoroughly first, including whether the partner offered sufficient stability. We first started using CashflowByWeb for ourselves. We wanted to add another dimension to it by linking it to our accounting program (Popsy/Ypsos). After all sorts of tests and analyses we decided that CashflowByWeb is indeed the tool of the future for debtor management.”

### **In the meantime you are a distributor of CashflowByWeb yourself?**

“After we had subjected the system to the most rigorous tests, we were convinced: with CashflowByWeb, Delta Point OCS has developed an innovative and unique online credit control system based on user-friendliness and a high flexibility towards customers. The software package is compatible with your accounting package and very simple to use. With this software your invoices are automatically followed up. In the meantime, therefore, we have become a distributor of CashflowByWeb ourselves and can recommend it to everyone. All debtors can be followed up from one integrated system. No more duplicate entries.”
